

PHOTO RETOUCH AND UPSCALE WITH **AI IN PHOTOSHOP**

@Seetha Ram

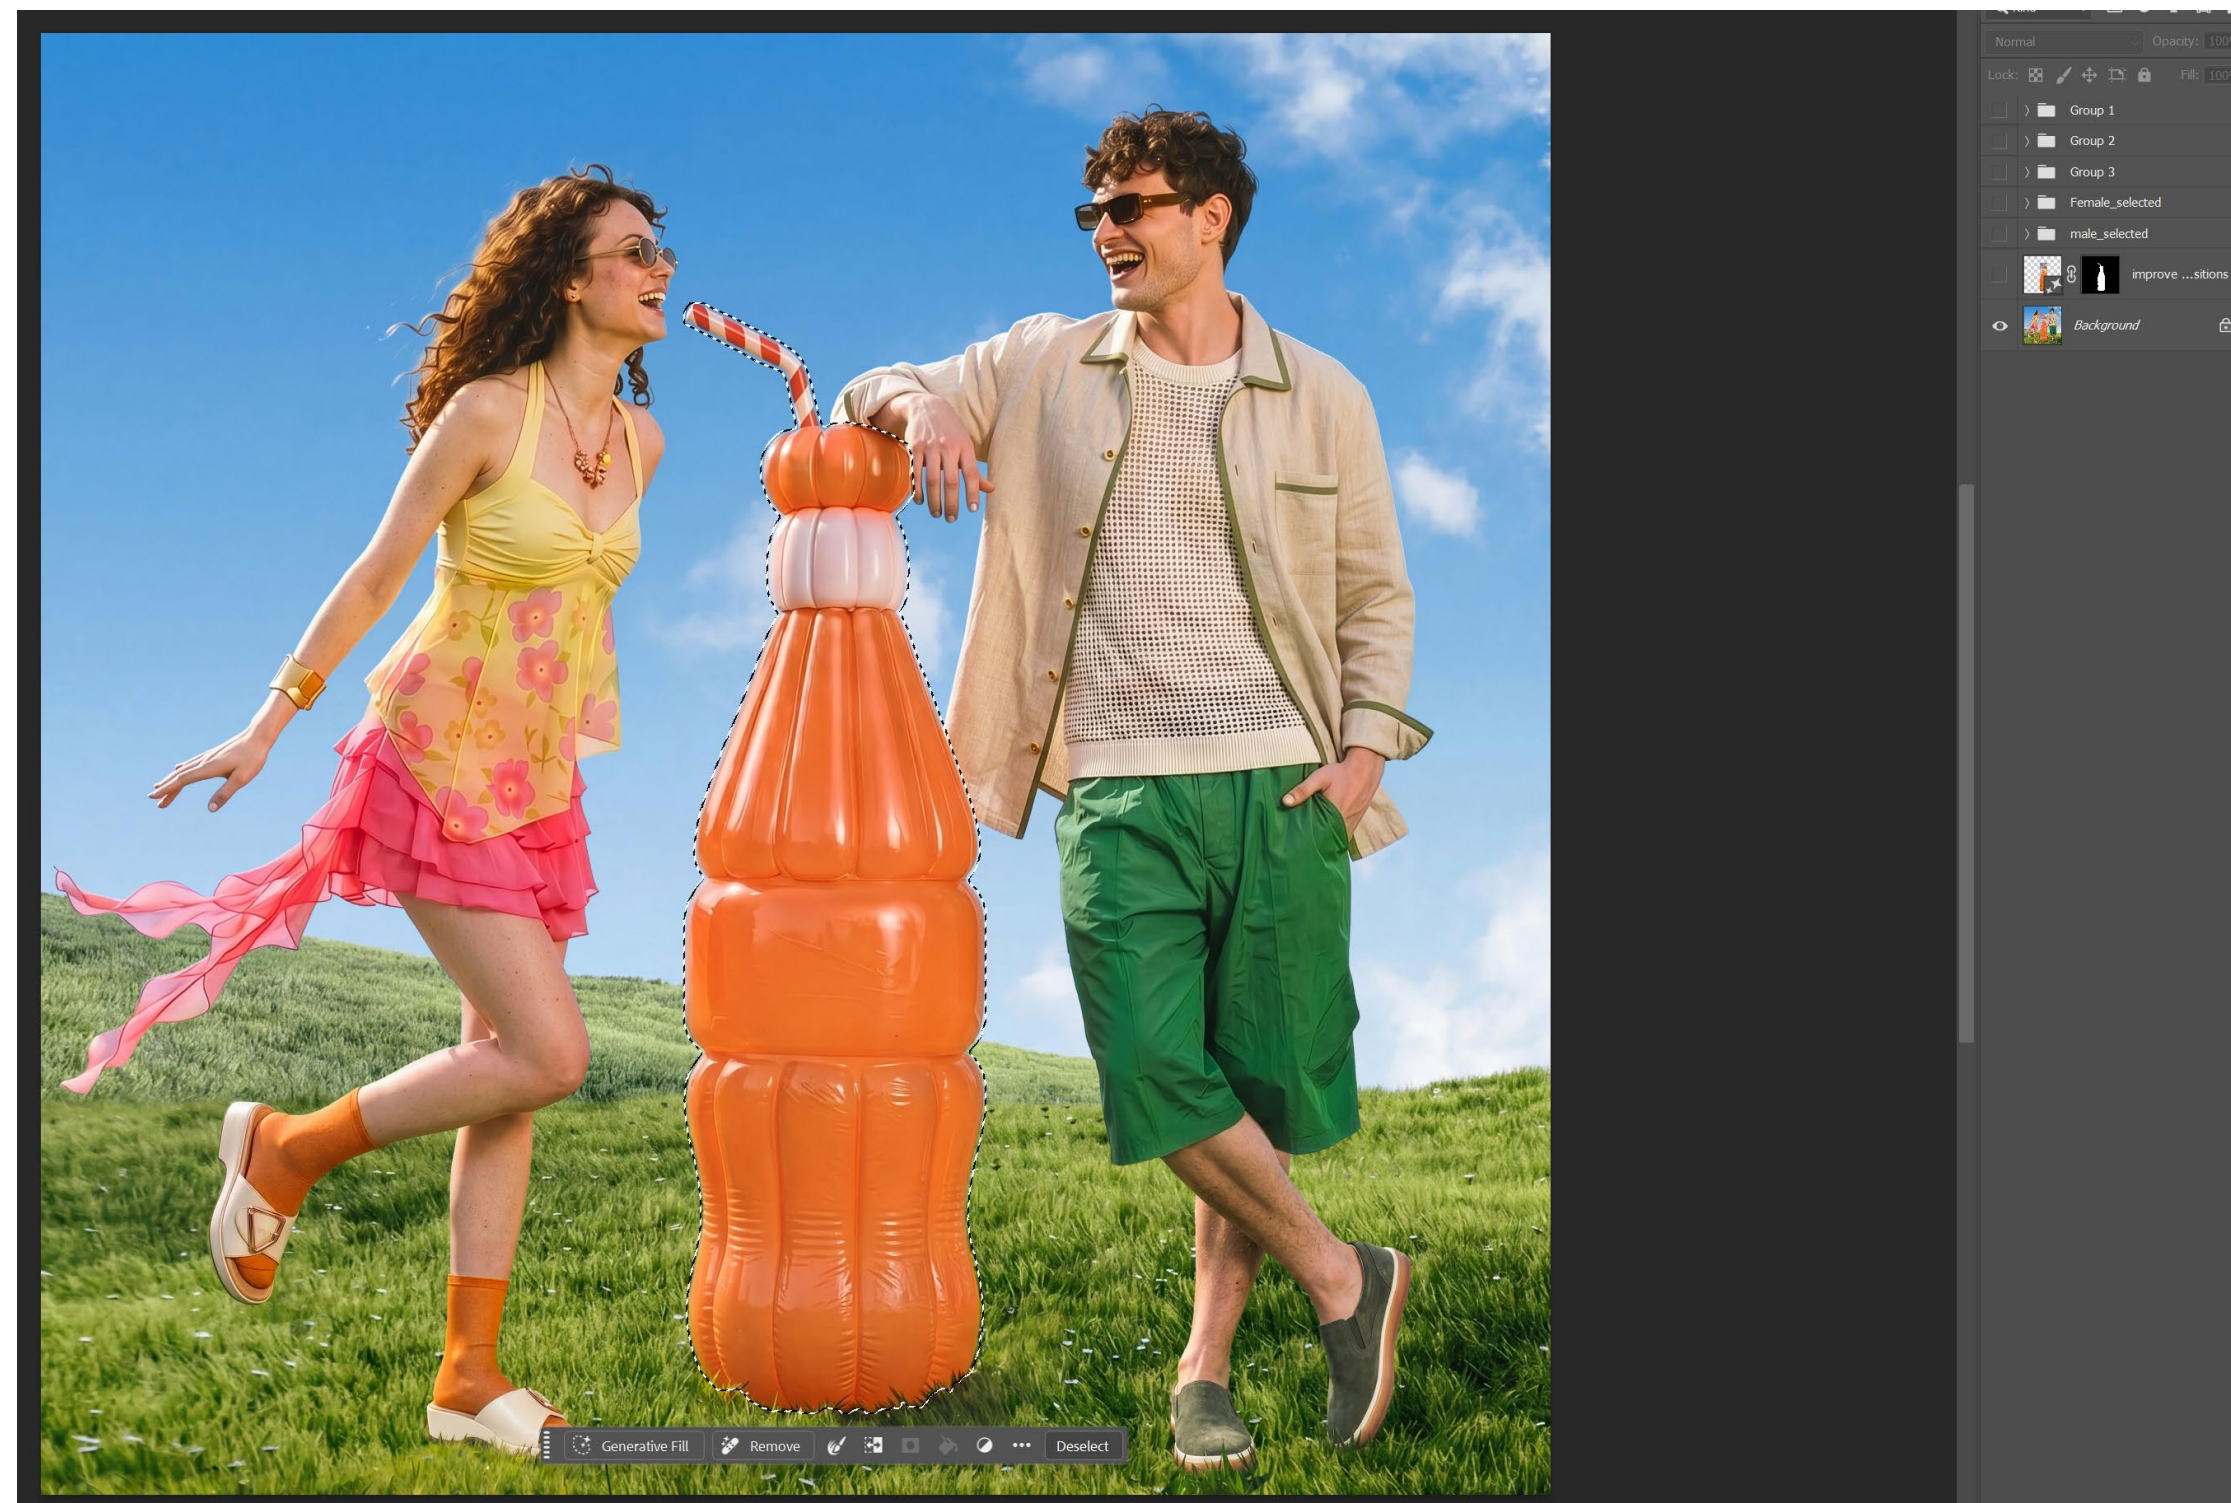

1. Open Photoshop and load Image (Raw or low resolution)

2. Go to Image > Generative Upscale > Model : Topaz-Gigapixel > Scale: 2X

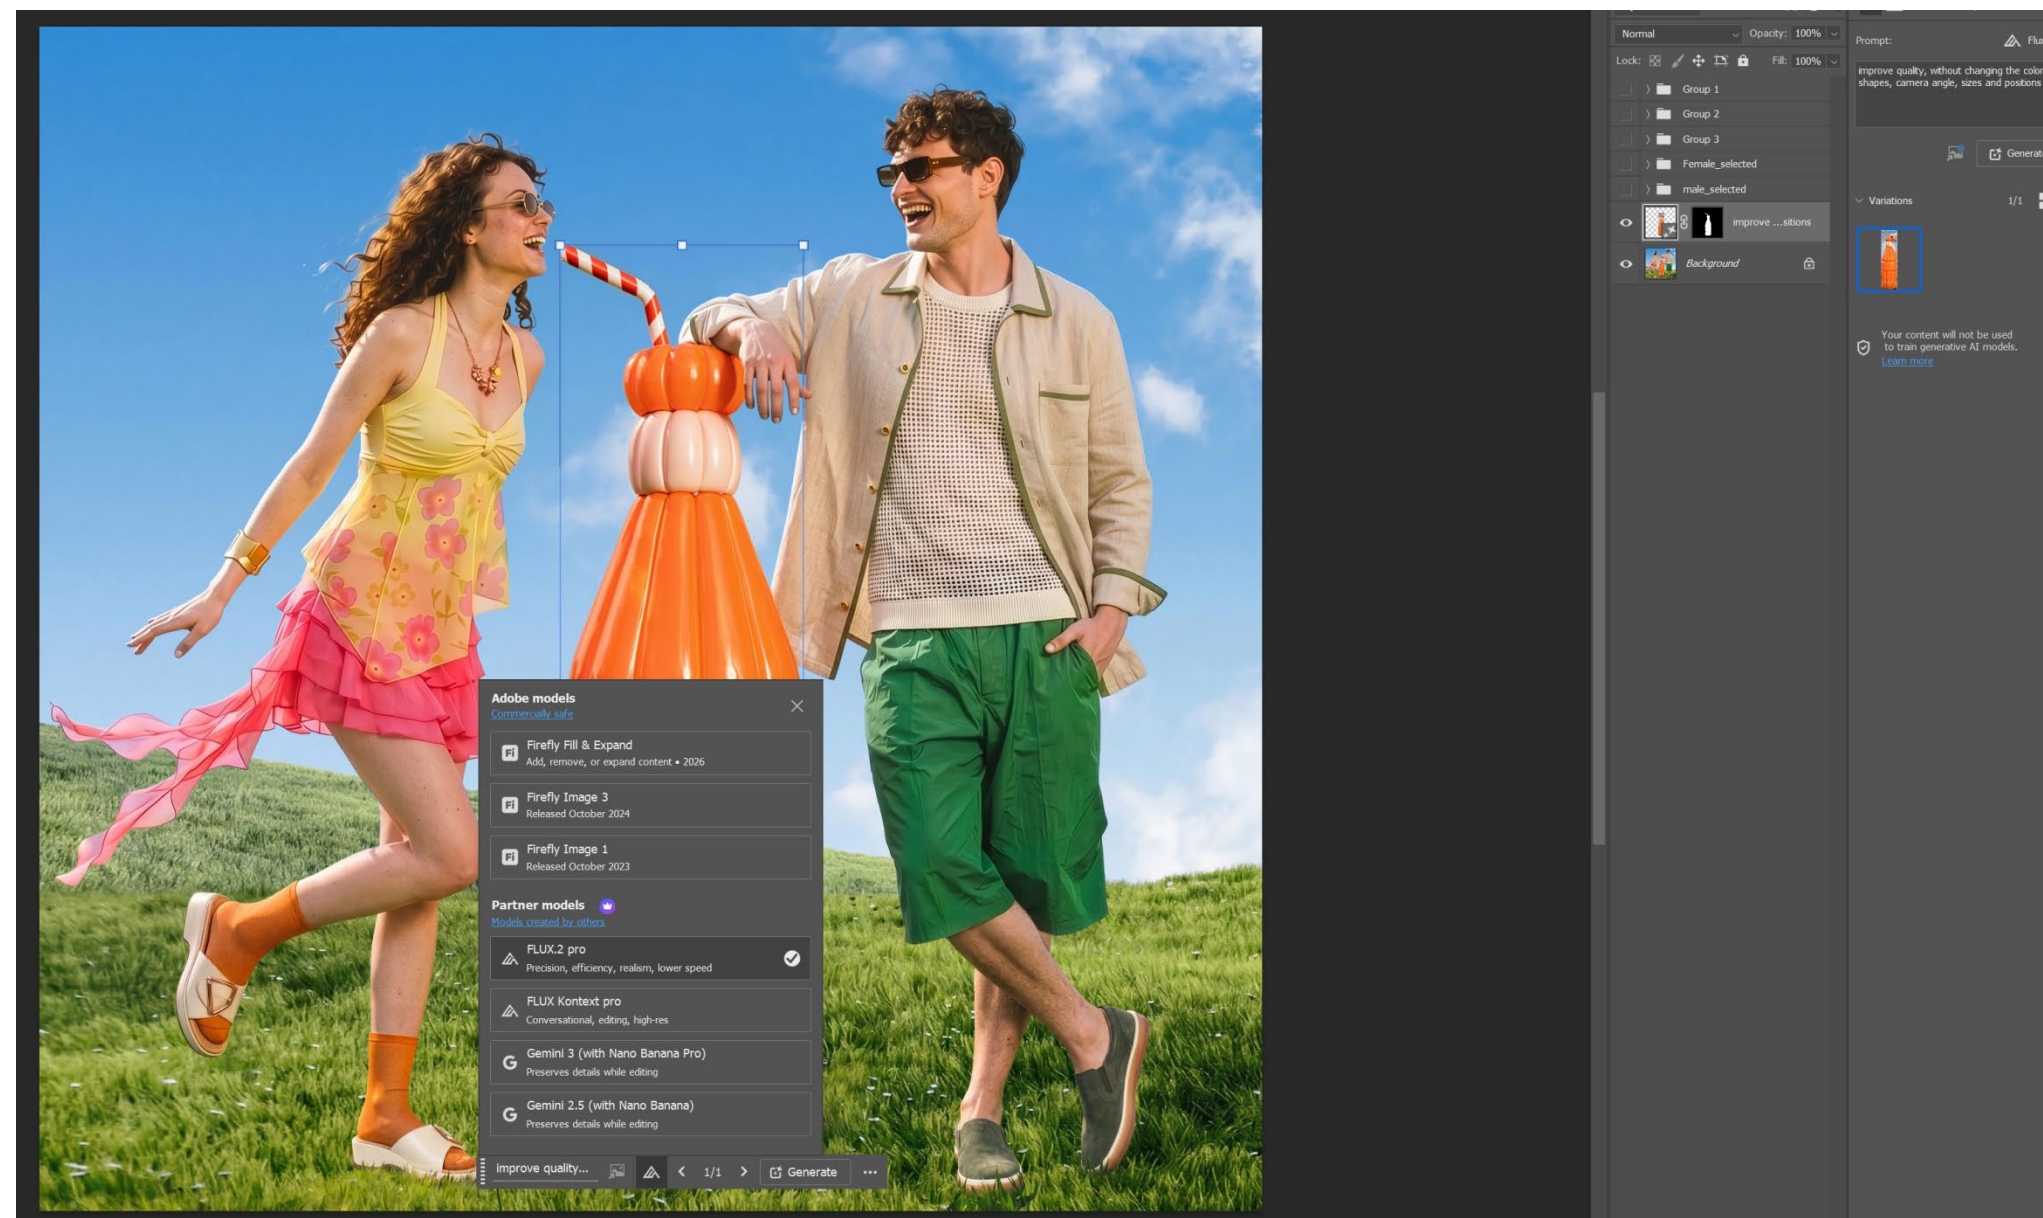

3. To improve the quality of the people, elements and objects in the image.
Select each item individually to generate with AI in photoshop

4. Click “Generative fill” Option

5. Choose AI Mode from drop down:

- Firefly Fill & Expand – to fill or correct the artifact areas.
- Gemini 3 (Nano banana pro) – to enhance the details of the people and apparels.
- FLUX 2 Pro – to improve the quality of the people and objects
- FLUX Kontext Pro - to edit the objects and person charecterstics.

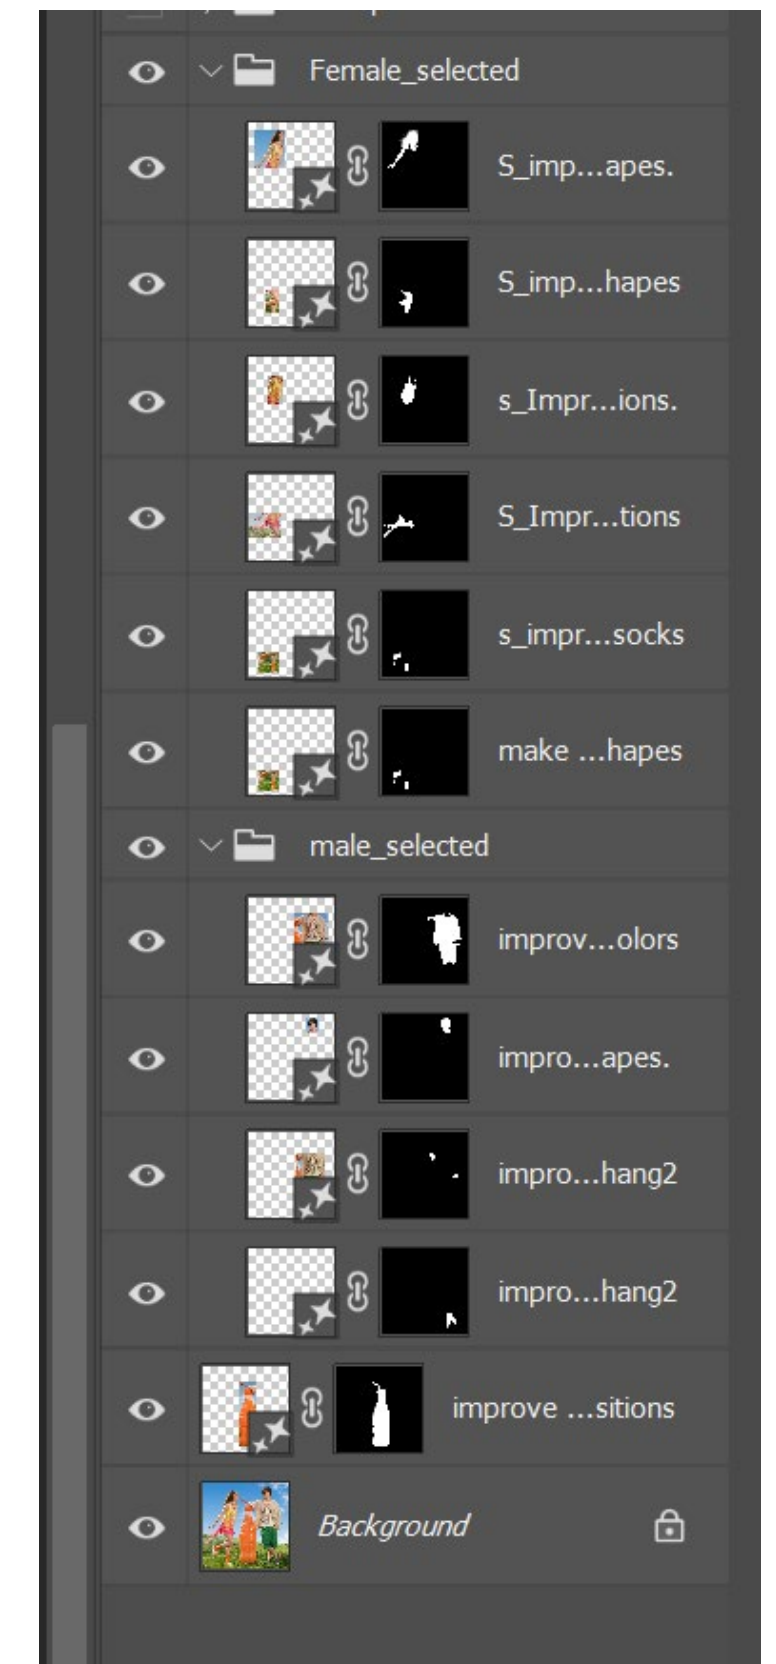

6. Provide the prompt with the context on changes required for the selected area

Example prompt for Flux 2 Pro: **“improve quality, without changing the colors, shapes, camera angle, sizes and positions”**

7. Repeat steps 3 & 6 for each selection are in the image.

Tip: Select and generate with the small and equal characteristic areas only, to avoid artifacts and hallucinated elements.
